

John Bachmeyer -cl.

The John Bachmeyer class is a typical gas tanker that carries LPG from the distant gas-mines to the big process facilities in places like Scintilla Prima. A rather slow vessel but over the years it has proved to be a stable and reliable design, and today it is used by a number of consortiums all over the sector.

Specifications

Type:	Civilian Craft, LPG tanker
Cargo:	LPG (Liquified Petroleum Gasses)
Capacity:	Capacity: 138.2 million m ³ (4878.9 mill. ft ³)
Displacement:	42.800.000 Tons Deadweight
Size:	3.481 meters lengths between pp
Main Propulsion:	3 Bauer & Wilkins Heavy Duty Thrusters 2 RR Proteus Warp drives
Armaments:	None
Crew:	15
Passengers:	None
